PROFESSIONAL EXPERIENCE

Full-Stack Developer (Product & Front-End Focus)
Variable Z - Los Angeles, CA | 2021 - Present
- Built and maintain a live e-commerce platform using React, Next.js, Node.js, and Express.
- Led front-end development and UI/UX implementation for a customer-facing product.
- Developed back-end services supporting authentication, orders, and payments.
- Integrated Stripe, PayPal, and third-party REST APIs.
- Improved performance and stability through debugging, refactoring, and iterative releases.

Freelance Full-Stack Developer
Remote | 2020 - Present
- Delivered custom web applications and feature development for multiple clients.
- Collaborated with designers, marketers, and developers to implement front-end and back-end solutions.
- Gathered requirements, communicated timelines, and translated business needs into technical execution.
- Worked in shared codebases using Git workflows and coordinated deployments.
- Provided ongoing support, debugging, and performance optimization.

UI Developer
SeePoint, LLC - Redondo Beach, CA | 2019 - 2021
- Led redesign and maintenance of company e-commerce website.
- Developed UI components for kiosk-based systems.
- Collaborated with engineering and R&D teams to refine usability and interface clarity.

Computer Lab Technician
Woodbury University - Burbank, CA | 2016 - 2018
- Provided technical support across Mac and Windows environments.
- Troubleshot hardware, software, and network issues in a high-traffic lab setting.

Interactive Design Intern
VirtuLabs - San Francisco, CA | 2017
- Contributed to Project SkyLights installation presented at Digital Design Days + OFFF Milano.
- Integrated TouchDesigner with hardware systems for real-time visual experiences.
